## CHINESE BLIGHT RESISTANT CHESTNUT

GROWING YOUR OWN LARGE SWEET

A number of years ago the Chestnut blight destroyed the Native American Chestnuts. The U. S. Dept. of Agriculture—after many tests—introduced a type of Chinese Chestnut not only blight-resistant, but an early bearer of large, good quality nuts. Trees start bearing when very young, often in 1 to 5 years, and succeed anywhere the American Sweet Chestnut formerly grew; in fact they can be grown over a wider area and may be grown wherever Peaches thrive. We recommend planting in a well-drained sunny location. Plant Chinese Chestnut for attractive home ground shade trees and also reap a harvest of delicious, sweet nuts. Prices, 10 to 12 inch plants, 2 for \$1.50; 5 for \$3.00. Heavy 12 to 18 inch, 2 year old, \$1.25 each; 3 for \$3.50.
